

VEGA+ BKL

Maximum specialization in BKL / ECL labels production

Advanced off-line booklet maker

Accurate handling combined with a user-friendly concept make the VEGA+ BKL a benchmark booklet maker enjoying all the benefits of off-line processing. Enabling accurate tension and register control, the machine allows for clean processing.

A patented lamination unit, designed to process multiple types of laminated labels, creates the correct curvature for the finished booklet keeping the base label at full size. With no need for subsequent processing steps, the VEGA+ BKL cuts your costs by reducing the need for further machinery.

Tailored individually to respond to each customer's demands, the machine also converts blank SA material into finished BKL labels with in-register brailled laminate.

Also suitable for the processing of coupon labels and multiply labels, furthermore the VEGA+ BKL features flatbed die-cutting and satisfies the strict demands of the pharmaceutical industry.

VEGA+ BKL is a highly profitable solution for all booklet types (flat, curved, thick) with significantly reduced label processing for maximum quality.
